

Dear Upcoming 6th Grade Students and Families,

Congratulations on completing 5th grade! You all worked hard to complete such a great year! In efforts to keep your minds sharp over the summer, you will complete one assignment that reinforces the skills you learned in fifth grade. Attached is a calendar for you to complete one assignment each day during the month of July and August. You will record your answers on the blank calendar attached.

The calendar will count as your **first project grade for the first marking period of 6th grade**. If you do not bring the calendar to school on time, you will lose **5 points for each day it is late**. Therefore, try your absolute best and bring it with you by **Friday, August 31, 2018**. This assignment should be done independently and to the best of your ability. You may refer to any 5th grade notes or your workbook.

You must show all of your work to receive credit. If you require extra paper, please make sure to write your name, label the questions, circle your answers, and staple it to the back of your calendar.

All incoming 6th graders are required to know their multiplication facts through the 12 times tables. If you know them, practice your speed to see how quickly you can recite them! Practice your division facts as well. They are just as important as multiplication!

Enjoy your Summer. See you in August!
